

1. What is a Test Case?

A test case is a document that tells a tester what to test, how to test it, and what result is expected. A test case is a step-by-step guide to check whether a feature works correctly.

2. Why do we write Test Cases?

We write test cases to make sure every feature is tested correctly. They also help other testers repeat the same testing.

Keywords

- Easy to test
- No confusion
- Repeat testing
- Better quality

3. What is a Test Scenario?

- A test scenario tells us what feature we need to test.
- **Example:** Login Functionality. That's a **Test Scenario**.

4. What is a Test Case?

- Example:
 - Scenario: Login Functionality
- Test Cases:
 - Login with valid username
 - Login with invalid password
 - Login with empty fields
 - Login with SQL Injection
- See?
 - One scenario can have many test cases.

5. Difference

Test Scenario	Test Case
What to test	How to test
High level	Detailed
One line	Step by step

Easy Trick:

Scenario = What
Test Case = How

Components of Test Case

A professional test case contains:

- **Test Case ID**
 - Example: TC-001
 - Unique number.
- **Title**
 - Example: Verify login with valid username and password
 - What are we testing?
- **Preconditions**
 - Meaning: What should already be ready before testing.
 - Example
 - Website is open.
 - Internet is working.
 - User is on Login page.
- **Test Steps**
 - Meaning: Step-by-step instructions.
 - Example
 1. Open website
 2. Enter username
 3. Enter password
 4. Click Login
- **Test Data**
 - Meaning: Input values.
 - Example
 - Username: tomsmith
 - Password: SuperSecretPassword!
- **Expected Result**
 - Meaning: What should happen.
 - Example: User should login successfully.
- **Actual Result**
 - Meaning: What actually happened.
 - Example: User logged in successfully.
- **Status**
 - Example: Pass or Fail

Easy Example

Field	Example
Test Case ID	TC-001
Scenario	Login
Title	Login with valid credentials
Preconditions	Login page is open
Steps	Enter username → Enter password → Click Login
Test Data	tomsmith / SuperSecretPassword!

Expected Result	Login successful
Actual Result	Login successful
Status	Pass

Interview Questions

What is a Test Case?

A test case is a document that contains test steps, test data and expected result to verify that a feature works correctly.

What is a Test Scenario?

A test scenario tells us what feature we need to test.

Difference?

Test Scenario tells us **what** to test.

Test Case tells us **how** to test.

Who writes Test Cases?

QA Engineers write test cases.

Why are Test Cases important?

They help us test software correctly, avoid missing features and improve software quality.
